Pilot Implementation

INCLUDES BY GROUP, CROSS FUNCTIONAL, VALIDATION, OPERATIONALIZE & INTEGRATION

Enterprise Rollout

RELEASE MANAGEMENT, CONTINUAL ASSESSMENT, CONSTANT TUNING & EXPANDED OPERATIONS

On-going Operations

ADMINISTRATION, FINE-TUNING, MONITORING & CONTINUOUS PRODUCT SUSTAINING

ALL AVAILABLE SERVICES

The Comodo consulting approach follows a proven flexible methodology. The key to success is designing an implementation to fit your infrastructure, staff availability, staff and experience, operational practices and corporate goals.

1

Guided Implementations

Experienced consultants, mentors, and instructors for end-to-end setup

2

Advanced Implementations

Adapt to proven IT and security methods with our cyber expertise

3

As Needed Consultations

Create self-sustaining experience and expertise with our consultations

4

Product Health Checks

Protect your organization from tomorrow's threats with our maintenance

PRO SERV

GUIDED IMPLEMENTATIONS

Your experienced team benefits from our programmatic approach to implementing security solutions.

Comodo provides project management and consulting to ensure that the implementation meets customer needs in a timely and efficient manner.

Your staff will learn from our training programs and our consultative approach to assure uneventful ongoing operations and administration of your Comodo implementation.

PRO SERV

ADVANCED IMPLEMENTATIONS

Comodo works with your team to provide project management and experienced consultants to deliver custom implementation plans and tasks.

Sample projects include: deploying to new OS platforms, third party replacements, assessing operations, integrating Comodo's best practices into your operations, providing specific tuning and configuration for complex environments.

Our goal: efficient and timely completion of our consulting projects in your complex and dynamic enterprise.

PRO SERV

AS NEEDED CONSULTATIONS

Take the uncertainty out of maintenance notifications and prompts. Comodo will provide your IT staff the people to proactively communicate, perform and maintain your cyber security.

As the security industry and threat perspective continuously evolves, so do your needs. Administrators change configurations and update software, inadvertently exposing themselves to malware.

Request our Pro Serv experts to resolve issues as they are needed.

PRO SERV

PRODUCT HEALTH CHECKS

Organizations, applications, infrastructure, operations – they're always changing. The security industry and threat perspective continuously evolves. Administrators change configurations and update software, inadvertently exposing themselves to malware.

The Health Check includes assessing configurations, suggesting ongoing updates and adjustments, ensuring our 100% protection is operating at its optimum level. A cybersecurity Health Check today will protect your organization from tomorrow's threats.

Comodo is the world's leader of next-generation open-source cybersecurity, with the industry's most disruptive innovations.

We help customers stop breaches with groundbreaking isolation technology that neutralizes ransomware, malware and cyber-attacks. Our complete cloud-native framework delivers a zero-trust architecture with active breach protection for the most comprehensive defense against zero-day threats. Comodo's cybersecurity products maximize intelligent sharing between every component of the platform, therefore providing superior security. We are the only company that analyzes and gives a trusted verdict for 100% of files on a network.

Comodo leverages innovation to celebrate and support the cybersecurity community by offering the very first open-source endpoint detection and response (EDR). We believe an open-source model using community-powered collaboration will ensure every organization has access to the industry's most sophisticated EDR.
